

OPEN NEXT-proaudio's ARMONIA+ PROJECT

Connect your N-RAK to a Ethernet network and connect your PC to it.

Open Armonia Plus and click "Browse".

Select the project from NEXT Preset Library

Click "Open"

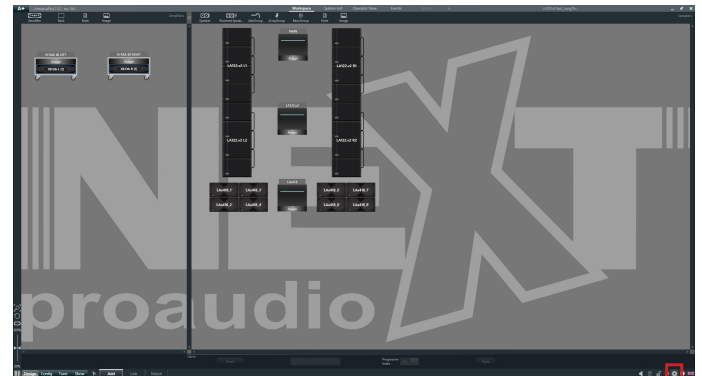

A configuration with Line Array, Subs and Racks is shown

N-RAK's are on the LEFT side

Speakers are on the RIGHT side

Open "Communication Manager" clicking on the **GEAR**

"Communication Manager" will be shown

Click on the **PLAY** icon in front of "All Devices"

Click Apply and then OK.

Click on the **MATCH** tab at the bottom of the window

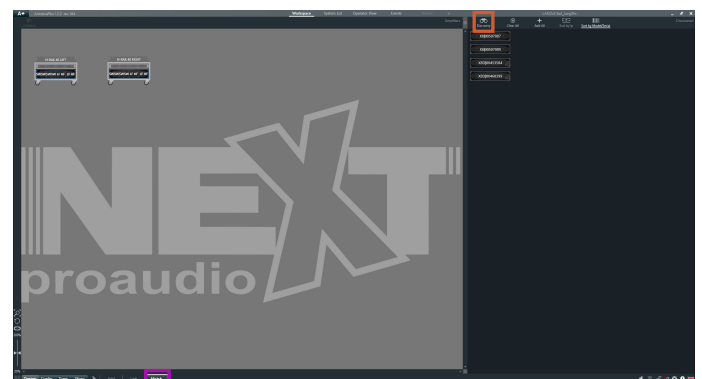

The right column will be show.

Click on **DISCOVERY** button at the top of the column

On the RIGHT side the connected amplifiers will be shown.

On the LEFT side are the "virtual" amplifiers

Now, is time to match one with each other.

First, one single click on the "real" amplifier on the right side

(the amplifier will start blinking the front panel for you to know which amplifier you are selecting) and then one click on the amplifier from the left side.

This will match the "real" and the "virtual" amplifiers and all the presets are sent to the connected amplifiers.

Match all the amplifiers you have for the show!
